PLANT AND SOIL

Contents Volume 232, Nos. 1–2 May 2001

PROCEEDINGS OF THE MILLENNIUM CONFERENCE ON RHIZOSPHERE INTERACTIONS

IACR-ROTHAMSTED, United Kingdom, 10–12 April, 2000

Guest editors:
David Powlson, Geoff Bateman, Keith Davies, John Gaunt, Penny Hirsch & Peter Barlow

Foreword 1–2

Section 1 Signalling and recognition in the root environment

Analysis of *N*-acyl homoserine-lactone quorum-sensing molecules made by different strains and biovars of *Rhizobium leguminosarum* containing different symbiotic plasmids
J.K. Lithgow, V.E. Danino, J. Jones and J.A. Downie 3–12

Signalling between arbuscular mycorrhizal fungi and plants: identification of a gene expressed during early interactions by differential RNA display analysis
H. Roussel, D. van Tuinen, P. Franken, S. Gianinazzi and V. Gianinazzi-Pearson 13–19

Methods for studying the nematophagous fungus *Verticillium chlamydosporium* in the root environment
P.R. Hirsch, S.D. Atkins, T.H. Mauchline, C.O. Morton, K.G. Davies and B.R. Kerry 21–30

Does allelopathy offer real promise for practical weed management and for explaining rhizosphere interactions involving higher plants?
M.A. Birkett, K. Chamberlain, A.M. Hooper and J.A. Pickett 31–39

Section 2 Root structure and function

Root proliferation, nitrate inflow and their carbon costs during nitrogen capture by competing plants in patchy soil
D. Robinson 41–50

The nutritional control of root development
B. Forde and H. Lorenzo 51–68

Effect of phosphorus availability on basal root shallowness in common bean
H. Liao, G. Rubio, X. Yan, A. Cao, K.M. Brown and J.P. Lynch 69–79

A comparison of structure, development and function in cluster roots of *Lupinus albus* L. under phosphate and iron stress
J. Hagström, W.M. James and K.R. Skene 81–90

Section 3 Biologically-mediated processes in the root environment

Rhizosphere carbon flow measurement and implications: from isotopes to reporter genes
K. Killham and C. Yeomans 91–96

Soil and rhizosphere as habitats for *Pseudomonas* inoculants: new knowledge on distribution, activity and physiological state derived from micro-scale and single-cell studies
J. Sørensen, L.E. Jensen and O. Nybroe **97–108**

Sulphur and phosphorus transport systems in plants
F.W. Smith **109–118**

Incorporating rhizosphere processes into field-scale (agro)ecosystem models
J. Arah **119–127**

Plant-mediated processess to acquire nutrients: nitrogen uptake by rice plants
G.J.D. Kirk **129–134**

Section 4 Biodiversity in the root environment

Plants and fertilisers as drivers of change in microbial community structure and function in soils
A.G. O'Donnell, M. Seasman, A. Macrae, I. Waite and J.T. Davies **135–145**

Soil fungi: diversity and detection
P. Bridge and B. Spooner **147–154**

On the relationships between nematodes, mycorrhizal fungi and plants: functional composition of species and plant performance
L. Brussaard, T.W. Kuyper and R.G.M. de Goede **155–165**

Bacterial diversity of the rhizosphere of maize (*Zea mays*) grown in tropical soil studied by temperature gradient gel electrophoresis
N.C.M. Gomes, H. Heuer, J. Schönfeld, R. Costa, L. Mendonça-Hagler and K. Smalla **167–180**

Monitoring temporal and spatial variation in rhizosphere bacterial population diversity: A community approach for the improved selection of rhizosphere competent bacteria
V.J Goddard, M.J. Bailey, P. Darrah, A.K. Lilley and I.P. Thompson **181–193**

Section 5 Exploitation of rhizosphere interactions

Enhancing the biocontrol efficacy of *Pseudomonas fluorescens* F113 by altering the regulation and production of 2,4-diacetylphloroglucinol
I.R. Delany, U.F. Walsh, I. Ross, A.M. Fenton, D.M. Corkery and F. O'Gara **195–205**

Plant and rhizosphere processes involved in phytoremediation of metal-contaminated soils
S.P. McGrath, F.J. Zhao and E. Lombi **207–214**

An integrated approach for the evaluation of biological control of the complex *Polymyxa betae*/Beet Necrotic Yellow Vein Virus, by means of seed inoculants
R. Resca, M. Basaglia, S. Poggiolini, P. Vian, S. Bardin, U.F. Walsh, C.M. Enriquez Barreiros, F. O'Gara, M.P. Nuti, S. Casella and U. Peruch **215–226**

Instructions for Authors **227–233**
